PROFILE

Multimedia Engineering student driven by the desire to create things people can truly see and experience. I bring a balanced mix of technical skills and creative thinking to every project — whether it's a video game, a VR experience, or a web application. A flexible team player who adapts quickly and enjoys tackling challenges collaboratively, I'm also comfortable taking ownership of tasks independently. Organized by nature, I thrive in technology-driven environments where creativity and problem-solving go hand in hand.

EDUCATION

Universidad Autónoma de Occidente Bachelor of Multimedia Engineering

Cali, Colombia
Expected 2027

Relevant Coursework: Video Game Development, Interactive Media Design, Audiovisual Production, 3D Modeling, UX/UI Fundamentals, Web Development.

Colegio Los Ángeles del Norte High School Diploma

Cali, Colombia
2011 – 2022

EXPERIENCE

Nebuly Studios Multimedia Engineer & Co-Founder

Cali, Colombia
Sep 2025 – Present

- Built 2D/3D video games, AR/VR/XR experiences, and interactive web applications using Unity and C#.
- Directed art and visual identity across multiple projects, ensuring cohesive design from concept to final build.
- Produced and edited audiovisual content including motion graphics, video editing, 3D modeling, and graphic design.

Universidad Autónoma de Occidente Multimedia Engineering Intern

Cali, Colombia
Sep 2024 – Nov 2024

- Designed and facilitated interactive activities for prospective students, showcasing academic multimedia projects in engaging formats.
- Supported production of multimedia materials and coordinated experiential events for institutional outreach.
- Enhanced audience engagement through interactive demonstrations and hands-on experiential strategies.

SELECTED PROJECTS

Molassault — 3D Narrative Adventure Game

Unity · C# · Blender · GitHub | Nebuly Studios / Universidad Autónoma de Occidente | Jan – May 2026

- Programmed core gameplay mechanics in C# — player controller, puzzle logic, power-up systems, NPC dialogue, and obstacle interactions.
- Led art direction for a post-apocalyptic industrial visual identity, overseeing 3D asset integration, environment design, and UX flow.
- Managed version control with GitHub, coordinated iterative playtesting cycles, and refined mechanics based on team feedback.

Molassault Website — Promotional Game Site via AI-Assisted Development [↗ Live](#)

HTML · CSS · JavaScript · Vercel | Nebuly Studios | Jan – May 2026

- Developed a promotional website using an AI-assisted workflow (Vibe Coding) to accelerate frontend development and iterate on UI structure rapidly.
- Delivered a cohesive web experience aligned with the game's visual identity, covering story, mechanics, team, and media gallery sections.

Campus Occupancy Monitoring System — Computer Vision & Space Analytics Tool [↗ Demo](#)

Python · Flask · YOLOv8 · OpenCV · HTML/CSS | Universidad Autónoma de Occidente | Jan – May 2026

- Built a web-based system using YOLOv8 and OpenCV to detect people in images and classify spaces as empty, partially occupied, or full.
- Implemented privacy-aware face blurring and a Flask dashboard for real-time occupancy visualization and reporting.

Caficultor VR — Immersive Coffee Production Experience

Unity · Meta Quest · VR Interaction · 3D Modeling | Universidad Autónoma de Occidente | Aug – Dec 2025

- Designed and developed a VR experience for Meta Quest simulating the Colombian coffee production process, from harvest to packaging.
- Built interactive mechanics with levers, buttons, and object manipulation; created Remegio, a custom-modeled campesino guide character.

- Integrated original and free-use 3D assets to construct an authentic environment rooted in Colombian coffee culture and XR design principles.

LEADERSHIP & ACTIVITIES

Creative Academic Teams — Universidad Autónoma de Occidente

Cali, Colombia

Active Member

2023 – Present

- Participated in collaborative multimedia innovation projects, contributing to creative direction and visual research.
- Supported cross-functional concept development, team coordination, and iterative project planning.

SKILLS & INTERESTS

Game & XR: Unity, C#, VR/AR/XR, Meta Quest, Game Design, Level Design, Interactive Storytelling

3D & Visual: Blender, 3D Modeling, Motion Graphics, Adobe Premiere Pro, After Effects, Photoshop, Illustrator

Web & Dev: HTML, CSS, JavaScript, Python, Flask, OpenCV, YOLOv8, GitHub, Vercel

Productivity: Notion, Trello

Languages: Spanish (Native), English (Intermediate – B1)
